Technical Product Manager

**Kate Khrenova**  
Sr. Product Owner

**Mishal Alam**  
Demand Generation Manager

# Tracking and Reporting Format

## Tracking

Free Trial and Sales  
Results tracked by  
Uptime.com

- Uptime.com will provide a custom URL (with UTM) for you to place on your site.
- If a user signs up by using that link, we will be able to track the “source” of sign up and will thereby be able to track all user activity i.e., Free Trial sign up, Sales conversion etc.
- # of Free Trial Signups (based on a unique referral URL)
- Success tracking of Free Trials (Utilization review - multiple logins, adding checks, adding status pages, North American, European IPs)
- Conversion tracking (Free Trial -> Paid Account)
- Conversion success tracking (Multiple months of billing, AVG LTV)
- Purchases/Customers by Unique ID

## Reporting

Provided by  
affiliate company  
on a weekly and/or  
monthly basis

- # of New Site Visitors
- # of Sessions
- Session Duration
- # of Clicks
- Bounce Rate
- All of these should be available by the day and on a cumulative basis and available to export to CSV format

# The Future of Website Monitoring

Comprehensive and easy-to-use website availability platform,  
for industry experts and partners like you.

Trusted by thousands of organizations worldwide

Award-winning, 24/7/365 Support team.

# The Uptime.com Advantage

## **SUPERIOR USER EXPERIENCE**

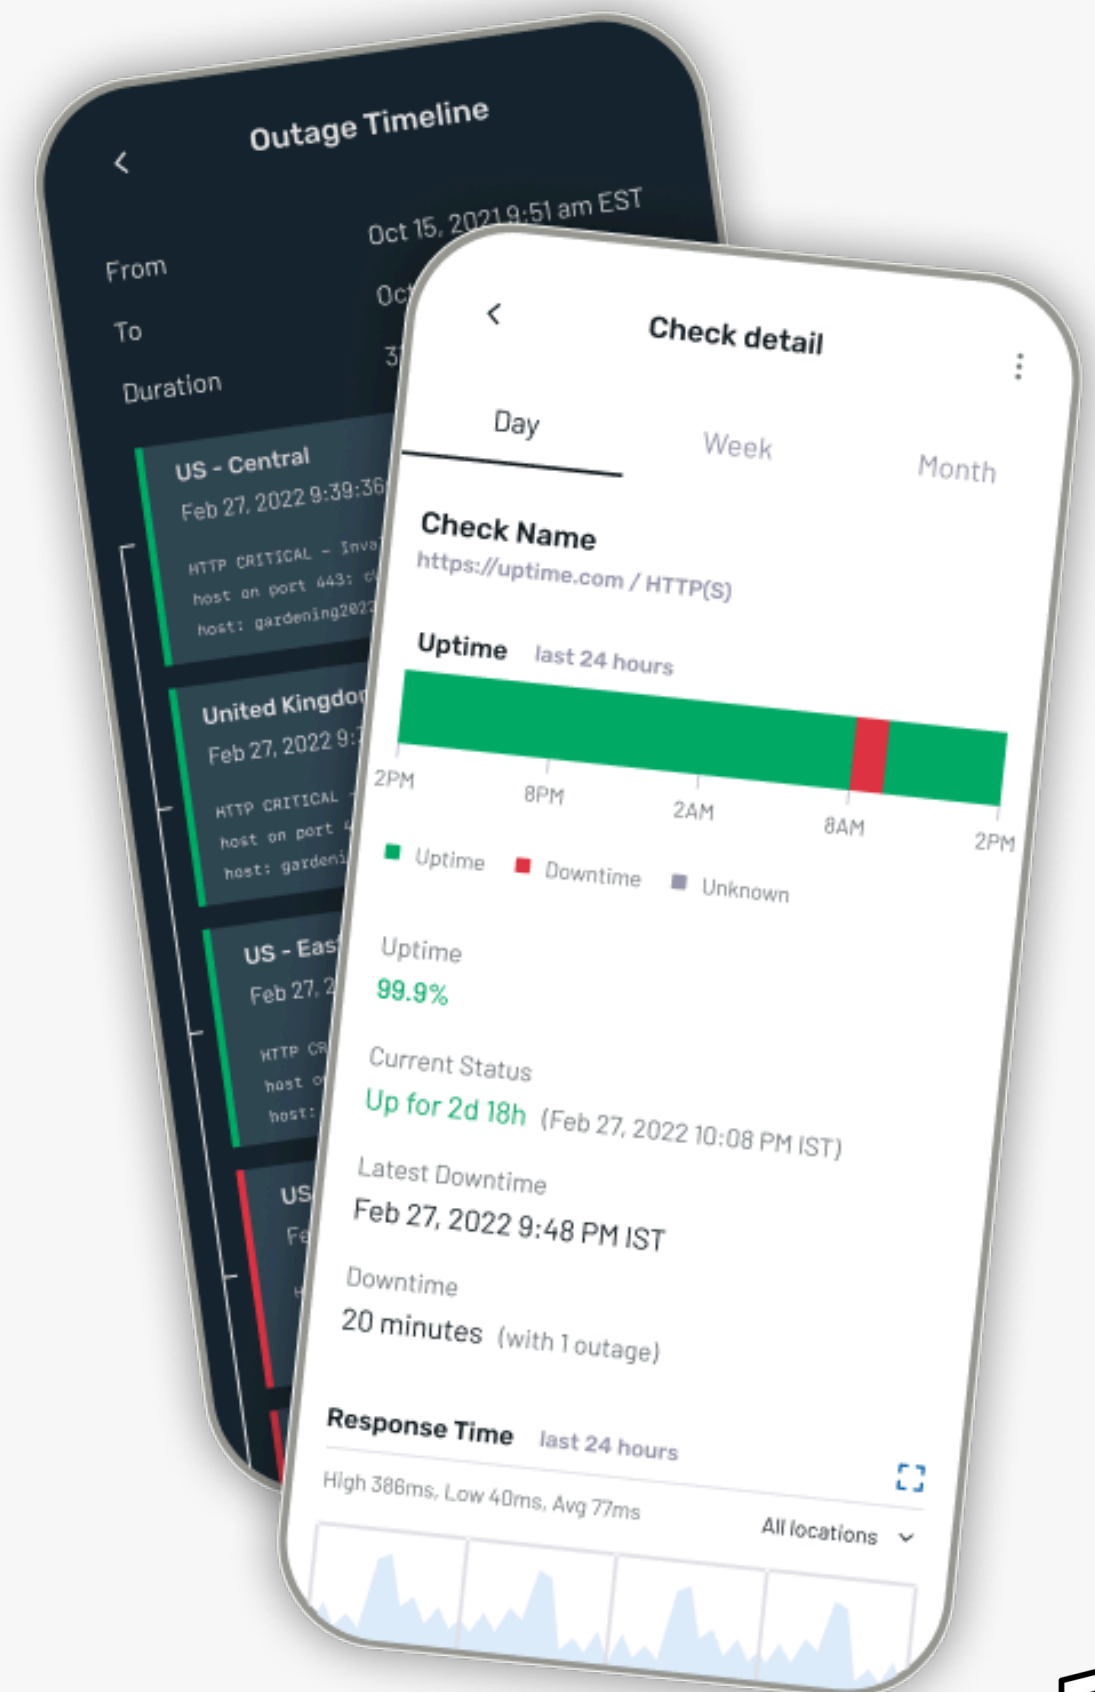

Dynamic visualizations instantly provide vital statistics and drill down details

## **SEAMLESS INTEGRATION**

Native compatibility with preferred DevOps tools to alert on service outages

## **CENTRALIZED REPORTING**

Streamline KPI & SLA reporting with intuitive reports and Status Pages

# Why Uptime.com?

“

*Because we believe in the power of **simplicity** and **efficiency**. Our goal is to **transform monitoring, availability, and response** into an effortless experience that doesn't demand a PhD. Experience seamless, effortless navigation and top-tier reliability as we redefine what it means to make monitoring systems accessible for everyone.*

# Return on Investment

## Deploy and Maintain in Minutes, Not Days

We've designed our system to monitor and validate complex behaviour of your website effortlessly. Allowing users, developers and SRE's to create or edit checks without coding, ensuring easy setup and maintenance.

## Low-Code Deployment with Specialized Checks

Quickly deploy checks and monitors with minimal coding, freeing engineers to concentrate on development while enabling organization-wide monitoring. Uptime.com features a unique transaction/synthetic recorder that automatically tracks and continuously monitors site interactions.

## Escalate Incidents

Uptime.com facilitates multi-level alert escalation at chosen intervals and repeated alerts to ensure team mobilization. With email, Slack, SMS, phone calls, as well as custom integrations

## Automated Reports

Our platform offers customizable and exportable SLA reports and Status Pages, both of which can be scheduled for email delivery, providing your team and clients with timely updates on incidents and maintenance.

## Global External Monitoring

External monitoring through Uptime.com, with 90+ Probe Servers across 45 countries in 57 locations, offers proactive insights into real user interactions, unlike reactive internal monitoring.

# Architecture & Security

## Trust and Security

Trust & Security at Uptime.com is mission critical part of our business.

See our Trust & Security page for more information on our mission:

<https://uptime.com/trust-center>

## SOC2 Certificates

Our SOC 2 Type II compliance report is available for distribution. It provides all details on our platform including an architecture summary and a full security audit.

## Sign the NDA

In order for you to obtain the report, please fill in the details in this form and sign the NDA:  
<https://uptime.com/security-request>

## Final Review

Once this is completed, the request will be reviewed by our Security & Operations team and automatically sent to the details provided on the form.
